

For questions:

Francesco Savastano

Email: nwscomps@gmail.com

Before Installing:

1) Remove the display of the copyright notices from all the components:

locate the file **NWSComps_Shared.inc** in the _inc folder. Open it and change the first line:
{.\$DEFINE NWSCOMPS_REGISTRATION_OK} to: {\$DEFINE
NWSCOMPS_REGISTRATION_OK}

2) Choose the right option for your ImageEn version

locate the file **NWSComps_Shared.inc** in the _inc folder.

{\$DEFINE IMAGEEN_5_0_LATER} //must be defined for imageEn versions >= 5.0

{\$DEFINE IMAGEEN_6_2_LATER} //must be defined for imageEn versions >= 6.2 and so on..

3) Enable or Disable support for VCL Styles:

locate the file **NWSComps_Shared.inc** in the _inc folder. And change this setting, according to your Delphi version or your preference:

{\$DEFINE NWSCOMPS_VCLSTYLES}

4) Choose the Nexus Database support in Thumbsbrowser

If you do not have the Nexus DB you have to undefine the directive.

locate the file **NWSComps_Thumbsbrowser.inc** in the _inc folder.

Change the line: {\$define TB_USEDDB} to {.\$define TB_USEDDB}

5) Remove any existing older packages.

Go to Delphi menu → Components → Install Packages

Locate the older packages and remove them.

6) Remove or rename to something else any previous installation folder of the package (if you intend to install in the same location)

7) Make sure the Installation paths are present in the Delphi Options before installing:

Go to your Delphi menu → Tools → Options → Library

You have to add the following paths to your **delphi library** and to your **delphi browsing path**, where "YourRootFolder" is the root installation folder, for example NWSComps

Library Paths (Win32):

YourRootFolder\WinAll\Jahn_Tablet

YourRootFolder\WinAll\NWSComps_Shared

YourRootFolder\WinAll\RGBCurves

YourRootFolder\WinAll\PaintEngine

YourRootFolder\WinAll\ImageProcessing_Addon

YourRootFolder\WinAll\ThumbsBrowser

YourRootFolder\WinAll\win32dcus

Library Paths (Win64):

YourRootFolder\WinAll\Jahn_Tablet

YourRootFolder\WinAll\NWSComps_Shared

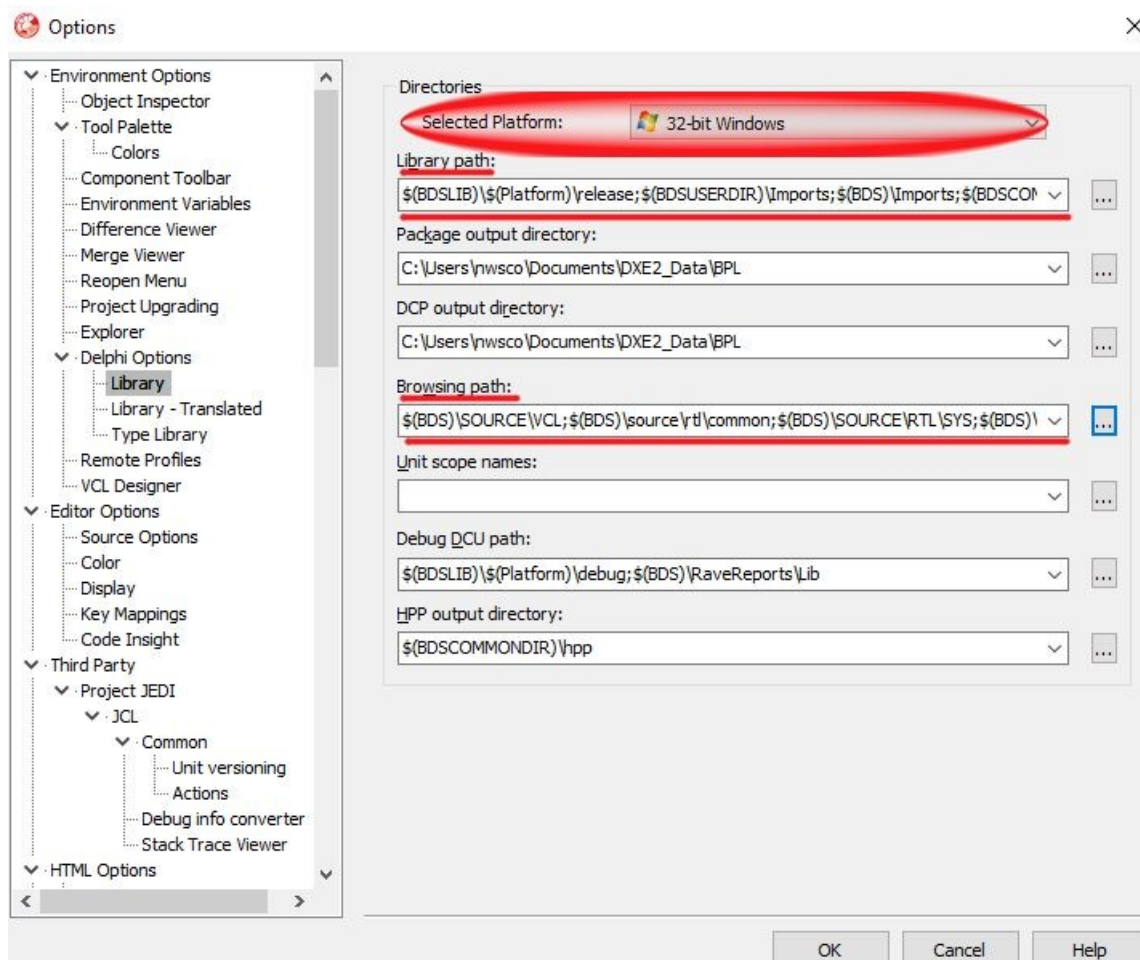

YourRootFolder\WinAll\RGBCurves
YourRootFolder\WinAll\PaintEngine
YourRootFolder\WinAll\ImageProcessing_Addon
YourRootFolder\WinAll\ThumbsBrowser
YourRootFolder\WinAll\win64dcus

Browse Paths (Win32):

YourRootFolder\WinAll\Jahn_Tablet
YourRootFolder\WinAll\NWSComps_Shared
YourRootFolder\WinAll\RGBCurves
YourRootFolder\WinAll\PaintEngine
YourRootFolder\WinAll\ImageProcessing_Addon
YourRootFolder\WinAll\ThumbsBrowser

Browse Paths (Win64):

YourRootFolder\WinAll\Jahn_Tablet
YourRootFolder\WinAll\NWSComps_Shared
YourRootFolder\WinAll\RGBCurves
YourRootFolder\WinAll\PaintEngine
YourRootFolder\WinAll\ImageProcessing_Addon
YourRootFolder\WinAll\ThumbsBrowser

Installation:

To install our components you will need to install 5 packages:

To facilitate the installation you can use the Bundle Project Group, that contains all 5 packages.

You can find these in the folder WinAll, each for each version of Delphi.

If you have a very old version of delphi (i.e. Delphi 7) you will not find the Bundle. You will have to go folder by folder and install the DPK files for each component.

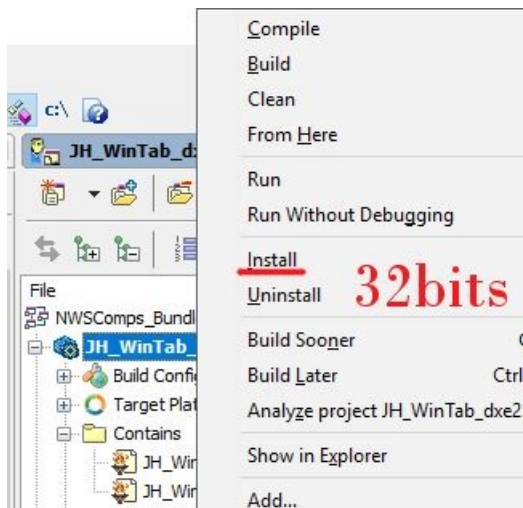

The following instructions are given for those version of Delphi that support both 32 and 64 bits, but can be followed also for those that have only 32 bits.

INSTALLING FIRST ALL 32 BITS PACKAGES

(activate the 32 bits target first for each package!!)

When installing follow this order:

- 1) Jahn Tablet Package (to support graphic tablet)
- 2) NWSComps_Shared Package (this package is runtime only, choose Build instead of Install)
- 3) RGBCurves
- 4) Image Processing Addon, Paint Engine, Thumbsbrowser

BUILDING ALL 64 BITS PACKAGES

(activate the 64 bits target first for each package!!)

When building follow this order:

- 1) Jahn Tablet Package
- 2) NWSComps_Shared Package
- 3) RGBCurves
- 4) Image Processing Addon, Paint Engine, Thumbsbrowser
